(Verse 1)

My feet have carried me
Beyond your memories
To places you can not be
Breathe in
The oxygen where I am
I know you can feel me
The hair stands on your neck

Can you remember what brought us here
Or are you just as lost as I am?
When will we find our way back home

(Chorus)

I'm disconnected from the ones above
(The ones above)
I'm disconnected from the ones who fell in between
And I stray
From this pathway
Though there's still nothing left of me

(Verse 2)

But now they've buried me
How could you let me be
Sucked in by the ones who dwell beneath

Can you remember what brought us here
Or are you just as lost as I am?
When will we find our way back home

(Chorus)

I'm disconnected from the ones above
(The ones above)
I'm disconnected from the ones who fell in between
And I stray
From this pathway
Though there's still nothing left of me
Though there's still nothing left of me

(Verse 3)

So I'll wave

Goodbye to my past as I stray
On my own

So now I'll wave goodbye
To my past
So now I'll wave goodbye
To my past
Now I walk alone

(Chorus)
I'm disconnected from the ones above
(The ones above)
I'm disconnected from the ones who fell in between
And I stray
From this pathway
Though there's still nothing left of me
I'm disconnected from the ones above
(The ones above)
I'm disconnected from the ones who fell in between
And I stray
From this pathway
Though there's still nothing left of me

Fall from grace
So I can earn my place
Leave no trace
So I can finally say
"Goodbye"
