One true thing
Is all I know
That's when it's time
For you to go
You don't choose
It chooses you

Oh one true thing
Is all I have
One true thing
Is all I own
One true thing
There's nothing else

And in the end what do we have?
We have each other that's enough
I've made mistakes I know that's true
I'm okay because of you
That one true thing's true

We were strangers
You and me
We couldn't talk
We couldn't see
How you cared
And I did too

One true thing
That hasn't changed
You reached out
And took me in
You changed my life
You changed my world

And in the end what do we have?
We have each other that's enough
I've made mistakes I know that's true
I'm okay because of you
That one thing's true
