This room is so lonely without you
And candle light only
Stretches so far.
My heart aches for you;
You are a shining star.

There's a pain in my chest
That I cannot hide
How I wish you were here.
But there's still time tonight.

And if you'd come over
I'd wait in the doorway for you.
And we could share a moment
While I look at beautiful you.

This night is all we'll ever need
And our hearts beat as one
I can feel you breathe (x2)

Lasttime: This night has just begun
