Look at me, take a good look at me
Can't you see this is for real
I will find my way to the day you stay
Deep in my heart where you belong
You are the one

And I will run until I find your love
I went searching for what's missing in my soul
In the darkness and the rain I won't hide in my pain
I am incomplete until you're here with me
And I will run

Find my way, trying to find my way
See the stars high up above
Baby lead the way, we'll become one someday
Deep in my heart where you belong
You are the one

And I will run until I find your love
I went searching for what's missing in my soul
The power of love is leading my way
I don't wanna you running away

(And I will run) Until I find your love
(Searching for what's missing in my soul)
In the darkness and the rain I won't hide in my pain
I am incomplete until you're here with me
And I will run
