"Try To Survive"

Visit "[Try To Survive](#)" on MotoLyrics.com

I want you to know, how i feel inside
oh I just try to survive!

vers.

You think you know me
you think you're so much better than me
Have you ever been afraid to be loved
have you ever seen the real world
I can feel my heart beats
all you do is creating lies
and inside of me everything is turned upside-down

I thought you cared about me but you don't
I thought I knew you but I guess I was wrong
please can you get the fuck out of my life
cause you don't deserve me and you know i'm right
You spend the rumors and damn you're so false
you better leave cause you don't mean nothing at all
here's a paper right down you're apologize you're not
my friend anymore so don't call me.

Ref.

Try to figure out, you never can
I try to ignore you somehow
cause that's a part of my plan
I'm left alone everything is built up with lies
running from it like never before
I hate those awful pictures in my eyes

Vers.

- Where were you when i needed you the most
- Right beside you one of you're Bro's
- I ain't taking you back, no never, no i Won't
- It's up to you girl, it's your choice
- You lied to me straight up in my face
- look i promise i can explain
- I hate you for that, you will never change
- But girl i love you

I thought you cared about me but you don't
I thought I knew you but I guess I was wrong

please can you get the fuck out of my life
cause you don't deserve me and you know i'm right
You spend the rumors and damn you're so false
you better leave cause you don't mean nothing at all
here's a paper right down you're apologize you're not
my friend anymore so don't call me.

Ref.

Try to figure out, you never can
I try to ignore you somehow
cause that's a part of my plan
I'm left alone everything is built up with lies
running from it like never before
I hate those awful pictures in my eyes
