

HeyMike! "Emotion Censor"

Sense my emotions please, can't you feel what's wrong
A silent scream, forwarding my thoughts
I hate why we haven't been, a perfect 10
Communication's lost again, you know
Perception has been distorted, and loathed

I haven't read the meter, but I often stayed to treat her
Now can you conjure up the line that's stuck
Between our difference

Take my reaction please, handle these by-gones
Your time is spent, we came and went with no bond
I love how I haven't been, a perfect 10

I'm promising what meant the world to me
Is now too far to see, and not enough to believe
Leaving is one messed up end, you know
Try habitually braving through bad zones

Please listen in somehow
