Tonight I suggest wearing your best dress
And when we show up their gonna be so jealous
Tonight I think I'm gonna make a scene of your scene
Beacuse their full of appologies
And everybody in the party will still be up dancing

And you're gonna hate me
If things get any worse
I would consider making all new best friends
If this scenes better then girl I wouldn't be caught dead
in that dress

So we wrote this song so you know your not invited
'Cause the party is on and you could sit at home in
silence
Don't even ask us your not comming in
And oh yeah the party is on yeah but don't get too
excited

See I've got this plan to make the girls dance
And a pretty good idea how to make them drop their

And tonight I think I'm falling asleep in the backseat
After party well that's all me
I'm dialing every single number I swear I would never
dial
And you can't stop me

If things get any worse
I would consider making all new best friends
And start a new band in a new land where the kids
know how to dance

So we wrote this song so you know your not invited
'Cause the party is on and you could sit at home in
silence
Don't even ask us your not comming in
And oh yeah the party is on yeah but don't get too
excited

We been drinking since we started
But I can't remember when

And got replaced with memories that we just can't
forget
You're in love
We're loving
We are not right in our heads
We have girlfriends in cities
That we have never been
Until we come back again

Okay

So we wrote this song so you know your not invited
'Cause the party is on and you could sit at home in
silence
Don't even ask us your not comming in (don't even ask
your not comming in)
Oh yeah the party is on yeah but don't get too excited

We said it a thousand times
[What you would know]
So get on with your lives
We got so many better things to do right
Than to be wasting our time
We said it a thousand times
[What you Ould know]
So fed up with you
We got so many other things to do

Drinking
We can't remember when
[When]

We been drinking since we started
But I can't remember when
And got replaced with memories that we just can't
forget
You're in love
We're loving
We are not right in our heads
We have girlfriends in cities that we have never been
