Is everything okay?
I know it's getting late
I'm working on the record
Like every effin' day
I told the whole band
that it's gonna take as long
As it goddamn takes
If the CD's selling good
Yvonne, I think it should
We'll get a big house in Hollywood
And I'll love you more
Than your dad ever could

When I kiss you on the lips,
You know that I mean it
When I get your name tattooed to my neck,
You better never forget
So dance with me, and never let me go
And I will always let you know
Girl, be always loving me
And I'll always be your G

I know that times are tough,
And money ain't enough
You said you need more of my love
Well Yvonne, help me get off these drugs

And when I kiss you on the lips,
You know that I mean it
When I get your name tattooed to my neck
You better come back
When I kiss you on the lips,
You know that I mean it
When I get your name tattooed to my neck,
You better never forget

So dance with me,
And never let me go
And I will always let you know
Girl, be always loving me
And I will always be your G

If you find my body buried below our home,
Know that I was always sicker
Than you had ever known

If you find my body sitting alone in my studio,
Just know you were the reason for every song I wrote
If you find my body buried below our home...

And when I kiss you on the lips,
You know that I mean it
When I get your name tattooed to my neck,
You better never forget
You know that I mean it
When I get your name tattooed to my neck
You better never forget
So dance with me, and never let me go
And I will always let you know
Girl, be always loving me
And I will always be your G

And I'll always be
And I'll always be
I'll always be your G
I'll always be your G
And I'll always be
And I'll always be
Always be your G
Always be your G

I hope you know I'm sorry
When you get this, will you call me?
And tell me that you love me
Just tell me, tell me!
I hope you know I'm sorry
When you get this, Yvonne, call me
And tell me that you love me
Just tell me that you love

I hope you know I'm sorry
When you get this, will you call me?
And tell me that you love me
Just tell me, tell me!
I hope you know I'm sorry
When you get this, Yvonne, call me
Tell me that you love me
Just tell me that you love me
