Downfall of Christ Mouths full of lies
Spreading the poison awayâ€¦
You wish you could see as clearly as me
Your church is dead and fake
Blood runs everywhere in the name of God
Look us in the eyes and tell us was it done with love?
Absence of face - fruit of your race
Your mind has been made up before
I slaughter your lamb with a rebel yell
A DEMONstration of hate
Blood runs everywhere in the name of God
Look us in the eyes and tell us was it done with love?

Every fucking day you try
To avoid your suicide
Bullets waiting to be fired
Walk on water to save your lies
That's right
Christfuck!

If I rise with my halo of flies
I'll look more real than you
Strength by strength Thought by thought
I will become more than you
Blood runs everywhere in the name of God
Look us in the eyes and tell us was it done with love?
His good will- your pain His word can drain
Your brain out of sense of real
Harder than faith is doubting your faith
A progress that slows down this lie
Blood runs everywhere in the name of God
Look us in the eyes and tell us was it done with love?
