chewing gum

wondering where i've been and what i've done

wondering where i'll go and where i'll run

hide myself away from everyone

chewing gum

doesn't ['does it'] bother you that you're not the one

keeps you up at night in a fear of dream

to count the silver bullet of your misty

it's yours to keep

chewing gum

innocence lost in electric smiles

perfectly cast in desperate clouds ['colds']

loving with under

city lights

with all their {miles}

and all i need

is you

by my side

by my side

by my side

chewing gum

wondering where i've been and what i've done

wondering where i'll go and where i'll run

hide myself away from everyone

chewing gum

got myself a piece of

chewing gum

got myself a piece of

chewing gum

got myself a piece of

chewing gum

got myself a piece of

chewing gum
