And I watched you take the fall
And I watched you take the fall
And I watched you take the fall
Looked at me and fight them all

And I watched you moved them all
And I watched you moved them all
And I watched you moved them all
As you broke down, we fight them

All we want is a hero, hero
All we want a hero to break our fall
All we want is a hero

I know that you're right when I'm wrong
And I know you been there along
I should understand why you're gone
I, I...

And I know you said to move on
And I'm trying my best to be strong
And I know that you're right when I'm wrong
I, I...

And I waited by the phone
And I waited by the phone
I waited there to long
Ring, ring, no one home

And I watched you moved them all
And I watched you moved them all
And I watched you moved them all
Then sit her back down instead of break down

All we want is a hero, hero
All we want a hero to break our fall
All we want is a hero

I know that you're right when I'm wrong
And I know you been there along
I should understand why you're gone
I, I...

And I know you said to move on
And I'm trying my best to be strong
And I know that you're right when I'm wrong
I, I...

All I need is someone to hold me
When I'm weak
All I need is someone...

All we want is a hero, hero
All we want a hero to break our fall
All we want is a hero

I know that you're right when I'm wrong
(Know that you're right when I'm wrong)
And I know you been there along
(I know you been there along)
I should understand why you're gone
I, I...

And I know you said to move on
(Know you said to move on)
And I'm trying my best to be strong
(Trying my best to be strong)
And I know that you're right when I'm wrong
I, I...

I know that you're right when I'm wrong
(Know that you're right when I'm wrong)
And I know you been there along
(I know you been there along)
I should understand why you're gone
I, I...
