I used to think that we could never make it.  
That million hearts could never beat as one,  
But now - miracle is not so hard to find.

There were times when I really doubted,  
If, after stormy weather, always comes the sun,  
But now - I can see the world from a different side, yeah.

Singer after singer, remembered,  
Different flags, but nations gathered -  
From the north to the south, all standing side by side.

There was laughter, and there was crying,  
But after all, I'm not denying -  
I'm so happy to be here, 'cause it's the time of my life!

Call me

Everytime you're feeling lonely,  
Our greatest wish is one and only:  
Sing with me, it's how it should be  
For the rest of our lives!  
...so won't you

Call me,

We'll reach the very top and nothing less,  
United in the song, that's all it takes,  
Fifty candles on the forty cakes,  
For many years of happiness.
