This is the face God gave me
And this is the face that I will use
It cannot leave me but I wondered if it could

Walk around and stare it out
No use saying maybe
When your thoughts are driving you crazy

Choose your life, choose it well

Dream denial, well, I never understood it
If it feels good
Tell me why can't I do it?

Look myself in the eye
No use saying maybe
When your thoughts are driving you crazy

Choose your life, choose it well

Where's my time? My time is now
So when you find it don't put it down
Let the music take you around

The fire in you has a right to burn
So don't let anyone put it out

Choose to live
