Love is something that's far away
If I see it, my heart hurts and tears fall
So I will leave you, my love
In order to love, goodbye, goodbye, goodbye
Don't forget me
Even if I have to live for one single second
My heart is only to love you
As I hide my sad tears for that one cause
I will leave, but please remember me
Please do not forget me, who left without even saying,
'I love you'
It's easier to leave when you love by yourself
Goodbye goodbye goodbye
Please don't forget me
Even if I live a thousand years
I would be a fool who only loves you
I am so jealous of your cell phone because it is next to
you right now
If there was only one person who loved you in this
world
It would be me, please remember that it would be me
Don't forget me
Even if I have to live for one single second
My heart is only to love you
As I hide my sad tears for that one cause
I will leave, but please remember me
Please don't forget me
Even if I live a thousand years
I would be a fool who only loves you
I am so jealous of your cell phone because it is next to
you right now
Don't forget me
