Not sure why I'm crying  
I've never felt like this before  
I think my heart's slowly dying  
Careless whisper, say no more  
Careless whisper, say no more

Here comes winter  
And raindrops falling on my skin  
Send someone to love me  
Before the cold crashes in  
Before the cold crashes in

So many things I don't get  
I leave for another day  
Lighting up a cigarette  
To smoke my loneliness away  
To smoke my loneliness away

Here comes winter  
And raindrops falling on my skin  
Send someone to love me  
Before the cold crashes in  
Before the cold crashes in

Buried alive  
No-one hears you scream  
Trying to smile  
Convinced it's all just a dream  
Convinced it's all just a dream
