### "Beyond Reclaim"

Disequilibrium  
Epicenter of neutron pollution  
Man has stepped beyond -  
Over the threshold of existence

The plague of cellular devastation  
Has spread too fast all over  
Membranes without shelter  
Radioactivity exposure

It's all beyond reclaim  
Now it's late to master the pain  
We turn eyes back once again  
Our memories will be our last friend

"I have become death -  
The destroyer of worlds"  
A bringer of life's abolition  
I open the gates to nihilo

Few hours left to the complete holocaust  
Extinction comes after the final mistake  
The essence of life is now lost  
For this there are no existing brakes  
Organisms disintegrate  
Life suffocates  
DNA abuse  
No hope for regeneration

Dead winds lash the surface  
Now eternity begins  
The beauty of life is blackened  
Universe has no longer an aim

Aeons of sick progression  
Mistaken evolution  
An inner strife for suffering  
A suicide of all mankind

Some fictional enemy  
Triggered that annihilation

Terrorist activity  
Caused the world's obliteration
