Every thing's so artificial  
A fabrication of what's beautiful  
I won't be satisfied in my plastic paradise

Give me something made to last  
I'm fading fast, something to hope in  
'Cause everything is broken down here  
Give me something made to last  
Something made to last

Rock 'n' roll, happiness and diamond rings  
These are the best of the temporary things  
There must be more for us  
'Cause it's all turning into dust

Give me something made to last  
I'm fading fast, something to hope in  
'Cause everything is broken down here  
Give me something made to last  
Something made to last

A kingdom's coming  
And it won't stop running  
Won't ever fade away

Give me something made to last  
I'm fading fast, something to hope in  
'Cause everything is broken down here  
Give me something made to last  
Give me something

Give me something made to last  
This world is made of glass, something to hope in  
'Cause everything is broken down here  
Give me something  
Something made to last, something made to last
