"Where We're From"

Visit "[Where We're From](#)" on MotoLyrics.com

we're the gods from the heavens
embodied in flesh
we are love made material
who came to share the earth

chorus
you know what we yearn
we forgot where we're from

we're the essence of love
we're the shore and the wind
we are one separated
into billions of thoughts

chorus
you know what we yearn
we forgot where we're from

what are we waiting for

we're the pole of the north
we're the pole of the south
all sharing one secret
that love is who we are

chorus
you know what we yearn
we forgot where we're from
