It felt like the sun
We are hollow
Light to the world
Film star

Define all the ways
We are hollow
I am the ghost
You are song

So you walk away from me
Were you ever there?
You were too quick or cold to believe
Unbelievable
You can never fail, we can never fail
We can only go down south
In flames a place you forgot about

Ooooooooooh

We are hollow
Light to the world
Film star
Define all the ways
We are hollow
I am the ghost
You are song

Lights that freeze turn perfect scenes into sorrow
Don't slip away
With all the words you had to say
You never had a prayer
You can never fail
We can never lose
We can only come down
Sink to your knees, let the others fire, sound

Well I fell out in the traffic
All that noise is coming at me
Cover noise and scream
And she was every kind of creature

Every twist that I imagined of a space

...

All your strength is about to be found
Crawling up out of the ground
Now play what you wanted to play
You say what you wanted to say
You finally found a way
All of the stars coming down

How did it feel when you hit the ground
It felt like the sun
We are hollow
Light to the world
Film star
Define all the ways
We are hollow
I was the ghost
You were song

It felt like the sun
It felt like the sun
It felt like the sun
I was the gost
You were song

It felt like the sun
It felt like the sun
