You ride to work
And say I love you
To heal all this pain
I'm dying to
Your words a flame
That feels like fire out for me
To see you smile
Is all I ever wanted to see
For me, for me

As we became
It became I need you
I lost my wings
And I lost you too
But you say the word
I'll sing like fire out for you
To see you smile, was all I ever wanted to do
For you

I tried to stay here
But all I did just brought you down
I pulled a way, and just look at me now
If I could Change, I'd tear this twisted frame in two
I'd end my life for you
For you, for you
For you
