Everyone has an angel  
A guardian who watches over us  
We can't know what form they'll take  
One day, old man  
Next day, little girl  
But don't let appearances fool you  
They can be as fierce as any dragon  
Yet they're not here to fight our battles  
But to whisper from our heart  
It's everyone of us who holds the power

Yet they're not here to fight our battles (2X)

It's you  
You have all the weapons you need  
Now fight!

Now fight! (3X)

Everyone has an angel  
A guardian who watches over us  
We can't know what form they'll take  
One day, old man  
Next day, little girl  
But don't let appearances fool you  
They can be as fierce as any dragon  
Yet they're not here to fight our battles
