There is no easy way to say goodbye
I've prayed this day would never come
It's best if I just walk away
Better if I run

Wish I could stay here on our secret island
Don't want to leave you in this place

But in another lifetime, a different world
We could be together, you could be my girl
Right beside me around every turn
In another lifetime, a different world

I swear I never meant to break your heart
Or ever cause you any pain
Now you're telling me you can't go on
You can't last another day

Where do I go with all this mixed emotion
I just want to fly away

To another lifetime, a different world
We could be together, you could be my girl
Right beside me around every turn
In another lifetime

We'll move along through our separate lives
It's gonna take some time, but we'll be alright

In another lifetime, a different world
We could be together, you could be my girl
Right beside me around every turn
In another lifetime
(repeat)

In another lifetime
In another lifetime
A different world
