"I'm All About You"

There's somethin' that  
I've got to say  
You're always with me  
Even though, you're far away  
Talkin to you on my cell  
Just the sound of your voice  
Makes my heart melt  
Oh girl, well it's true

I'm all about you  
I'm all about us  
No, baby, you never have  
To question my love

And every night  
There's a new crowd  
But it's always you  
That I'm singing about  
There is only one these words  
Are going out to  
Oh girl, I'm all about you

I know you worry sometimes,  
Some other girl will make me forget you're mine  
There's not a doubt in this world  
That anyone could take the  
Place of my number one girl

It's true  
I'm all about you  
I'm all about us  
No, baby, you never have  
To question my love

And every night  
There's a new crowd  
But it's always you  
That I'm singing about  
There is only one these words  
Are going out to

Oh girl, I'm all about you  
When i close my eyes i can see you  
It's like your right here  
And this feeling's only gettin' stronger  
You're with me everywhere

I'm all about you  
I'm all about us  
No, baby, you never have  
To question my love

And every night  
There's a new crowd  
But it's always you  
That I'm singing about  
There is only one these words  
Are goin' out to

Oh girl, I'm all about you  
I'm all about you  
I'm all about you  
I'm all about you  
I'm all about you....
