Planet earth is abused
You know we're to blame
Symposium shows it's not too late
Constant threat, Nuclear war
Corrective measures await us all
Staring death, In the face
The end of the human race
No it's not too late
No it's not the right time
To cross the gate invisible line
Established by mankind
Our planet is abused
Can't live this was any more,
I don't know
Are we near the end
It is real ten years it might be too late
No it's not the right time
To cross the gate invisible
Established by mankind
Our planet is abused
Won't live this way anymore
