Nemus obscurus Â– Umbra crudelis
A frightened lad stumbles through a creepy forest
Strepitus consternata Â– ventus mordicus
Biting cold pervades his fragile body and skin

Staturae exulatae Â– Ocularis ruber arsi
Anguish and affliction curdles his blood slowly
Lupae frendere Â– viam intercludiunt
Hopelessly he's searching for a releasing way out

The reaper breathes down his neck
Grins impishly fair in the face
Dashes his scythe sinisterly
Smells the childlike innocence

Portenti aggredientur Â– Luna plena lucida
Razor- sharp teeth biting into his flesh
Commutatio incepta - dolores indeprensi
The quest is over, he is the chosen one
