He murdered me
He murdered me
He took his tongue and touched it
And murdered me

I'm an old and lonely woman
Hating every other human
Nothing but my bitterness
Surrounds me

He murdered me
He made me lay
He murdered me
Down and display

He murdered me
My milky way
He murdered me
And kissed it

I'm an old and lonely woman
Hating every other human
Nothing but my bitterness
Surrounds me

He came asking for my hand
And was given this demand
You and all the other men
Must remove the unclean skin
From his penis

So they did
And then went to their beds and bled
Where my brothers cut their throats
Many empty nights ago

I am still that little girl
In the dark and dirty world
That was built so solidly
Around me
