I'm the man in the dark sedan and I have come to take
your hand
I was sent down here to be sincere, truthful and
steadfast
I came to say that judgement day of man has come to
pass
You can follow me and I guarantee to take you far away
But we must leave before the eve of everlasting gray
You will leave this place and soon replace the names of
those you know
With a brotherhood that has withstood the leeches and
the snow
