it might be late but it won't be early you got me to the
gate with time for a coffee it's getting late sounds like
a departure it's getting close sounds to me like a
departure until we meet again lets stay engaged until
then lets stay engaged lies over time float to the
surface lies over time they equal surface lies over time
though the reasons desert us lies over time with no
apparent purpose until we meet again lets stay
engaged until then lets stay engaged see the dead art
and you see your reflection fear no art and you fear no
reflection but don't look at me, i'm not the artist in
question sounds good to me, but i'm not the artist in
question until we meet again lets stay engaged until
then lets stay engaged
