Come to me Victory, we deserve to be as one  
Never leave, let us share lunatic ideals of love  
So menacing! Ready for conquering!  
"Forward"... no... "Onward"... choose a word for history  
Volumes will be written and spread 'cross the boiling  
seas  
For eternity! In infamy!

Chorus:

Envy our fortune, it'll never be yours no matter how  
hard you try  
Do what you're told and don't say a word no matter who  
lives and who dies!

Dominating together, tightening the iron grip  
Ruthless and driven! None can refuse or resist!  
Their crumbling bones support our throne  
The world is one color: the color of misery  
Chained and imprisoned all thanks to me!  
Believe me now! Don't question how...

Damn it all, I've reached the end! I would give anything  
to do it again  
Do it better than before... damn it all, give me another  
war!  
This time around it's only me! I say farewell to Victory  
Everyone get the fuck out of my way! I'm tearin' this  
place apart and you're gonna pay!
