Entering my room of fun  
In you go  
Deforming all that it contains  
Umbibing you in pleasure pains  
It's placed in your head my son  
Don't you know  
I will leave a lasting trace  
Torn from my smothering embrace

Chemical dreams  
Chemical dreams

As you're looking through my eyes  
You will see  
Things that you have never seen  
Together we'll explore it all  
Come with me  
To places you have never been

I will make you float on air  
Spinning round  
Reality caught in a spin  
Gravity will surely win  
Take the jump now if you dare  
There's no ground  
This flying vision ends so rough  
Grasping hands as wings fall off

Chemical dreams  
Chemical dreams

Set the trap  
Seal your fate  
Will take long  
But I can wait
