I'm tired of waiting for you to say that you'll be mine
I'm tired of facing you, to hear you say these things
take time

I was a rolling stone until you changed my ways
Now I know where I belong, don't you feel the same

Chorus:

Don't lead me on baby, don'
t lead me on now

Don't lead me on

I'm tired of chasing you over hill and over dale
I thought I was pacing you, but then you threw me off
your trail

All I want is the same from you, as what you get from
me

Why can't we see this thru, must you disagree

Chorus

ooo don't lead me on

I'm so tired but I gotta stay strong

After all I've waited for so long

To fins me a lover I could give my life to

I'd have nothin' if I didn't have you

I'm tired of wasting yours and my sweet precious time

I'm tired of tasting tears that should have long been
shed and dried

I hoped that maybe someday we'd look back and we
both could laugh

But as for now you've left me cold and broke in half
