We head down a little known road  
For the one that would take us to our dreams  
Which way to turns not an easy thing to learn  
And the road wasn't always what it seemed  
But everyday there's a little more light  
That gives us hope thru the middle of the night  
This road is ours to the end  
Chorus:  
Now, before you leave  
Let's take tomorrow and turn this love around  
Without you where would I be  
We've got tomorrow to turn this love around  
Starting out there was never any doubt  
All the answers rested in your hand  
But then later on, I could see that hope was gone  
Now I wonder if you really understand  
We burned our bridges quickly as we crossed  
Where something's gained there's a little bit gets lost  
This love is ours to defend  
Now before you leave  
Let's take tomorrow and turn this love around  
Without you where would I be  
Let's turn this love around  
We've got to turn this love around  
We headed down a little known road  
For the one that would take us to our dream  
Which way to turns not an easy thing to learn  
And the world isn't always what it seems  
But everyday there's a little more light  
That gives us hope thru the middle of the night  
This road is ours to the end  
Chorus--(Out)
