Fragment of ruins reflects our failure
Blinded by our own denial
As time passes by we grew stronger- we will not falter
RISE... from this failure that we'll soon forget
Reclaimed what was taken... reclaimed what was taken
from us

Pre Â-chorus
Right... they will burn tonight
March... there's no turning back
Strike... with no regret
Die... the killing is now

The shadow of past seems forever last
Our enemy bounds to be back for more
Paint a picture of their fear
This is one goddamn beautiful picture

Vengeance... never dies within mortality

Now this is the time to tell the world
Who we really are

Pre Â-chorus
Right... they will burn tonight
March... there's no turning back
Strike... with no regret
Die... the killing is now

Right... they will burn tonight
March... there's no turning back
Strike... with no regret
Die... the killing is now

Chorus
We will not forget the past... who we really are
AND TODAY WE SHALL BE REMEMBERED forever
Today is the day... we claim what was taken
The victor shall stand forever

Pre- chorus

Right... they will burn tonight
March... there's no turning back
Strike... with no regret
Die... the killing is now

Right... they will burn tonight
Right... they will burn tonight
Right... they will burn tonight
Right... they will burn tonight

Chorus

We will not forget the past... who we really are
AND TODAY WE SHALL BE REMEMBERED forever
Today is the day... we claim what was taken
The victor shall stand forever

Right... they will burn tonight
Right... they will burn tonight
Right... they will burn tonight
Right... they will burn tonight

They will burn tonight
They will burn tonight
