Stars dust the night sky  
We lay beneath and say not a word  
Cause I know what it makes you feel inside

Traveled down a long and windy road  
Bends and turns to the unknown  
And I wonder if you're leaving here with me

Do you laugh when I fall down?  
Cause I sure do every time  
And I wonder- if I'm ever, if I'm ever gonna grow up  
real soon

Thunderstorms take over the sky  
And I know you'll be by my side  
Listening to every crack it cries tonight

[PIANO SOLO]

Do you laugh when I fall down?  
Cause I sure do every time  
And I wonder- if I'm ever, if I'm ever gonna grow up  
real soon

And I wonder where I'd be today  
Lost and lonely  
Longing for you my babe
