Life sometimes changes so quickly  
Nothing's safe nothing's sound  
Just when I think I'm invincible  
The world turns it all upside down  
I thought you'd be here all my lifetime  
Working each day til it's end  
You were much more than just family  
You were more like a friend  
And with one simple phone call you were taken away  
I'm misunderstanding what justice it pays  
Are the powers above us playing some kind of game  
Now I'm left here to carry your name

*[Chorus:]*

And I know that you're out there  
Cuz I feel you running through my veins  
Why you're gone, that's the mystery

That's the reason I still call your name

Lived each day to the fullest  
Pushed himself to the edge  
Nerves of steel, scared of nothing  
Had a good laugh til the end  
I heard through a phone call you were taken away  
Too young to had ever lived all of your days  
When I heard of the reason I'd questions bout why  
What you loved to do took your life

*[Chorus:]*

And I know that you're out there  
Cuz I feel you running through my veins  
Why you're gone, that's the mystery  
That's the reason I still call your name
