Oh, its burning like a cigarette
this place is on fire
everyone is selling something
souls are for hire
come on girl come with me
I will be your supplier
lets heat it up melt it down and quench our desires

because you don't even care where were going to go
and I don't have a care in this sick world

so many nights
I've waited
so many hearts
are broken
so many people everywhere
are hurting
so many times I've waited
so many lights
are blinding
I just cant wait to come back from this trip

take another shot if your looking for love
today may be your day but tomorrow may never come
and if don't make sure you do it right
sleep all day and stay up all night
got to keep it going
got to keep moving
if you sit too long paranoia kicks in
you cant let things get under your skin
because when your comfortable thats when civilization
will end

its kind of funny
its kind of strange
its kind of funny
how fast things change

so many nights
ive waited
so many hearts

are broken
so many people everywhere
are hurting
so many times ive waited
so many lights
are blinding
I just cant wait to come back from this trip

so many highs
so many highs
(trip) background vocals

its kind of funny
its kind of strange
its kind of funny
how fast things change

its kind of funny
its kind of strange
its kind of funny
how fast things change
its kind of funny
its kind of strange
how fast things change
