Hear the silence of the winds making your own destiny  
go and face the mirror of their sin  
Only brave hearts found the way breaking all  
the dragon's spell  
cross the Argon's glade with heart in hand

Land of immortals I wait for my day  
to reach the wisdom of your skies  
Land of immortals you must belong to me  
from here to eternity

And between Elgard's hills near  
the ancient ruins of Kron  
you will face the trick of the old dwarf  
To obtain the second key you have  
to cross the bloody sea  
where the thirst of Tharos never ends  
Land of immortals I wait for my day  
to reach the wisdom of your skies  
Land of immortals you must belong to me  
from here to eternity

Holy force of wisdom spread through all the air  
I shall breathe you forever to end this epic holy quest  
My way will be hard but I would do all  
to reach the valleys where true heroes ride  
beyond the ivory gates

Land of immortals I wait for my day  
to reach the wisdom of your skies  
Land of immortals you must belong to me  
from here to eternity
