In the winter night a lonely wolf  
Defying the coldness  
I recall his force to face  
The long way to the North

Clash of the thunders  
Might of the starlords  
Rage of the ice storm  
Wrath of the gods

For a new legend  
Dragons and angels  
Will storm the darklord  
Quaking his world

The sacred flames of Heaven  
Forgotten winds of war  
Celestial wide horizons  
New golden rising dawns

The embrace of ice and snow  
Could stop the bravest warrior  
But the thirst for justice still  
And more will warm our soul

Clash of the thunders  
Might of the starlords  
Rage of the ice storm  
Wrath of the gods

For a new legend  
Dragons and angels  
Will storm the darklord  
Quaking his world

The sacred flames of Heaven  
Forgotten winds of war  
Celestial wide horizons  
New golden rising dawns

(Chorus)

Raging wild  
Divine starfire  
Burn dark worlds of ice and snow

Raging wild  
Divine starfire  
Fates collide in your great source  
Wild immortal force

[Solo]

Clash of the thunders  
Might of the starlords  
Rage of the ice storm  
Wrath of the gods

For a new legend  
Dragons and angels  
Will storm the darklord  
Quaking his world

The sacred flames of Heaven  
Forgotten winds of war  
Celestial wide horizons  
New golden rising dawns

(Chorus x2)  
Raging wild  
Divine starfire  
Burn dark worlds of ice and snow

Raging wild  
Divine starfire  
Fates collide in your great source  
Wild immortal force
