Weapons, weapons, weapons
M-16, and 45's help your country stay alive
They got the guns but we got the trigger
That gun of mine make me feel a whole lot bigger
Social dogma you think you're safe
I think I'm losing my fucking mind
Do it with reality do it fast
If they shoot at me I'm gonna shoot back
Cuz I like guns and guns like me
I like guns they made America free
I like guns and guns all the way
I like guns weapons, weapons, weapons
So you're lost in your lost world
With my own weapon I'd rather be dead
People on the street getting shot every hour
That's where time is losin'
Time to look out your front door
Blow that sucker right off the floor
Load your gun and let him have it
The right to bear arms the right to be free
I like guns and they guns like me
I like guns they made America free
I like guns and guns all the way
I like guns everybody run
People on the street you think you're safe
There's new guns all over the place
If they're the new toys the government'll have them,
you know it
Time to not let them oppress you
Time to force your life on them
Tell 'em the way cuz you know it
Tell 'em the way cuz that's your right
I like guns and guns like me
I like guns they made America free
I like guns and guns all the way
I like guns weapons, weapons
The right to bare arms
