It's raining again
Like it always does about this time
So cold
Like the beat of my heart

November always brings out the worst in me
Waiting in silence, I just feel black

There's a bullet for every man
And I'm calling the shots
Cold steel in my hands

So many ways to kill
I know of them all
So many graves to fill

Splitting the night with fire
I'm a hit man on the run
Beneath the streetlight sirens wail
And I holster a smoking gun
In the shadows of night fall
I'll be slipping away
I don't miss and I don't look back

It's raining again
Feels like ice upon my skin
Empty and hollow
The look in my eyes
Nighttime always brings out
The beast in me
Someone is coming
And I feel black

Call me a gun for hire
I get the job done
Put him in my sights
I'll fire
I am the killer elite
I'm one of a kind
I'm the deadliest man on the street

[CHORUS]

Blood spills
And mixes with rain
I just leave him
He didn't feel much pain
I just get to kill 'em
So that's all I do
I don't ask myself why
Would you?
Sure I think about it
But there's no remorse
So why do I do it?
For the money of course
Sometimes I just laugh out loud
But the hear
There're already dead by then
I pack up my gear

It's raining again
By now you thin I just don't care
So cold
Feel my stare
November always brings out the killer in me
My hand on the trigger
I only see black
