When the music's loud
And there's nothing to say
You can only watch me move
You can only watch me sway

See how I turn
But never walk away
See how I hang around
How I patiently await

You're so far away
Wouldn't you agree?
It's time to make your move
Make your way over to me

Chorus

Come closer now
If you wanna talk to me
Come tell me now
Do you like what you see?

Come here, sit down
If you wanna get next to me
Won't you tell me now -
Do you like what you see?
Do you like what you see?

My heels are high
And if you can follow my seams
I'll take you to a place
You've never been

If I showed you everything
I'd have you on your knees
So let's take it slow

Like a long night's sweet dream

You're so far away
Wouldn't you agree?
It's time to make your move
Make your way over to me

Chorus

Here I am right before your eyes
I think you see something that you like
I hope by now you realize
I've got you hypnotized

All alone in a crowded room
There's only me and you
Come, baby, come to me soon
Before the music's through

Chorus
