

## GusGus "Starlovers"

Visit "[Starlovers](#)" on MotoLyrics.com

I am in love with god I am in love with stars I am in love  
with something coming close from far - you are in love  
with god you are in love with stars you are in love with  
something that will tell you who you are - they need  
love they need god they need guidance from above  
- you are in love with god you are in love with stars you  
are in love with something that will tell you who you are -  
love god love god and affection you know exactly what  
it means still you are only in your teens - they need  
love they need god they need guidance from above  
- get together
