Hush now baby, don't you pout  
Spring is just around the corner  
You may be down but you're not out  
Spring is just around the bend

The honey circle or the wine  
Just when you all but lost your mind  
It's gonna hit you from behind  
Spring is just around the corner, trust me

Well, all the lake is frozen and the well is empty  
We're staring into the abyss  
There's that old turner phrase  
That my grandmother lent me  
Goes something like this

The darkest part of the night  
Always comes before the light  
That's in the Bible, it's got to be right  
Spring is just around, spring is just around  
Spring is just around the corner

I think the President put it best  
When he gave his big address  
He said, I know what they told you in the press  
But people, spring is just around the corner  
Trust me, spring is just around the corner

Spring is just around, spring is just around  
Spring is just around the corner
