"Straight Into Love"

Visit "[Straight Into Love](#)" on MotoLyrics.com

Faster than light here comes the night
Tomorrow is now
You flow through my veins, inside me you'll stay
There is no doubt

You're one in this world, no diamonds no pearls
Like your love divine
So high off the ground, we'll never come down
No limit no sky

Straight into love, we'll break through the dark
And light the world up from the sky when we collide
Straight into love and never let go
We'll light the world up from the sky into the night

No turning the tide, with eyes open wide
There's no stopping now
With all that we have we stand on the edge
Before we die down

Straight into love, we'll break through the dark
And light the world up from the sky when we collide
Straight into love
We'll light the world up from the sky into the night

We found the place where we belong
Out of the dark our flame is strong
We're moving fast, we won't look back
Higher and higher we go

Straight into love, oh
Straight into love
Straight into love
We'll light the world up from the sky into the night
