I saw the sun rise into the sky  
I knew it was a good day  
Went to school got an A on the test  
And Iâ'm quite okay

Walking down the street got my hands in my pockets  
Thought it couldn't be true  
I thought this day couldn't get any better  
And that's when I met you

I already know that Iâ'm outta control  
But that's something that I  
Gotta work on  
You are nothing alone but together  
We can rule this world

Oh, oh  
Rule this world

Oh, oh  
Rule this world

You waved at me and I waved at you  
And I guess that was it

So I walked back home to my house  
And the candle was lit

I wonder what will happen tomorrow?  
Will it be fun?  
But I know you outnumber me  
Ten thousand to one

I already know that Iâ'm outta control  
But that's something that I  
Gotta work on  
You are nothing alone but together  
We can rule this world

Oh, oh  
Rule this world

Oh, oh  
Rule this world

I already know that Iâ'm outta control  
But that's something that I  
Gotta work on  
You are nothing alone but together  
We can rule this world

I already know that Iâ'm outta control  
But that's something that I  
Gotta work on  
You are nothing alone but together  
We can rule this world

Oh, oh  
Rule this world

Oh, oh  
Rule this world
