If I knew your name by Jacques Mees  
A smile from your face can make me feel better  
Your tender lips must be sweeter than wine  
And your dark eyes they shine like a rainbow  
If I knew your name I would always remember

But you know, I'll be gone,  
Before the night starts falling  
I'll be drifting out on my own

I can see you watching, while I am singing  
You're like a star that brights up the crowd  
And it's like an arrow that hit us together  
If things would be different I would walk up to you
