It was a day in July, with a sunset like fire  
I had you in my arm  
Those first fragile words, some kind of conversation  
Your life had just begun

Go, you don't need to hurry  
I'll pretend not to worry  
I'll be near you when you call

Walk with the wind behind you  
And the sun in your face  
It makes everything worldwide

Every step along the way  
Every night and every day  
I'll be there learning to let go, oh oh oh  
Learning to let go  
I don't wanna say goodbye  
But I've got to let you fly  
And so I'm learning to let go, oh oh oh  
Learning to let go

Funny how time passes by  
Now and then we sit together  
You ask for my advice  
I don't have all the answers  
Just do your best and  
Don't lose that sparkle in your eyes

Walk with the wind behind you  
And the sun in your face  
It makes everything worldwide

Every step along the way  
Every night and every day  
I'll be there

Learning to let go, oh oh oh  
I'm learning to let go  
I don't wanna say goodbye  
But I've got to let you fly  
And so I'm learning to let go  
I'm learning to let go

Life's a rollercoaster ride  
Once you're up then you're down  
You may slip, you may slide  
Just get up off the ground  
In times of trouble I will be there by your side  
I know you'll make it on your own

Every step along the way  
Every night and every day  
I'll be there learning to let go, oh oh oh  
Learning to let go  
Learning to let go  
I don't wanna say goodbye  
Learning to let go  
But I've got to let you fly  
Learning to let go, oh oh oh  
Learning to let go
