"Breathe"

Visit "[Breathe](#)" on MotoLyrics.com

why do all the lonely people go, friends they thought
they knew don't want to know. try to ind a place to hide
as they fall onto there knees, someone catch them
please.

everybody hurts, everybody aches.
everybody falls, everybody breaks.
just breathe, let it out and breathe.
everybody cuts, everybody bleeds.
every hidden scar is just to find. so breathe, let it out
and breathe.
just breathe.

can you feel the circus in your head, don't you know
your reasoning mislead. so stand up if you give a
damn, its only killing you, don't you feel it too?

everybody hurts, everybody aches.
everybody falls, everybody breaks.
just breathe, let it out and breathe.
everybody cuts, everybody bleeds. every hidden scar
is just to find so breathe, let it out and breathe just
breathe.
where do all the lonely people go?
stand up if you give a damn.

everybody hurts ,everybody aches.
everybody falls, everybody breaks.
just breathe, let it out and breathe.
everybody cuts, everybody bleeds. every hidden scar
is just to find, so breathe, let it out and breathe.

everybody hurts, everybody aches. everybody falls,
everybody breaks.
just breathe, let it out and breathe
everybody cuts, everybody bleeds. every hidden scar
is just to find. so breathe, just breathe...
