(Cassidy K. Taylor)

Sure was a blessing baby when you walked through
that door

I was on the wrong path I've been on too many times
before

My life was in a downward spiral spinning out of control
That's when you saved me from what could have been,
I'll never know

(Chorus)

Cause people search their whole lives just looking for
love like this

I found what forever felt like the moment that we
kissed

We've both been down this road, but we never had
made it this far

Till you took off your wings and you wrapped 'em
around my heart

You make me the person I need to be - that sure
sounds like an angel to me

I was on a dead end street on a road to nowhere fast
That's when you came along baby, you put it all in my
past

I was in the dark so long that I couldn't even see
Without you here with me there's no telling just where
I'd be

(Chorus)

Cause people search their whole lives just looking for
love like this

I found what forever felt like the moment that we
kissed

We've both been down this road, but we never had
made it this far

Till you took off your wings and you wrapped 'em
around my heart

You make me the person I need to be - that sure
sounds like an angel to me

(Repeat Chorus)

Like an angel to me
