(D. Burnette / J. Osborne)

Everytime I see you smiling
I see a love so real
And everytime I see you smiling
Words can't explain the way I feel.

If they made me king with a fortune
And told me that I could rule the world
It would take one thing more to make me happy
That would be your love little girl.

Everytime I see you smiling
I see a love so real
And everytime I see you smiling
Words can't explain the way I feel.

If they made me king with a fortune
And told me that I could rule the world
It would take one thing more to make me happy
That would be your love little girl.

That would be your love little girl.
That would be your love little girl...
